

PAUL JULIUS D. LABRADOR

pauljulius8709@gmail.com | 09512580881 | Sugarland, Lumbo, Valencia City Bukidnon

SUMMARY

Entry-level software developer and BS Information Technology graduate with hands-on experience developing internal web applications using React, Laravel, PHP, MySQL, and PostgreSQL. Experienced in API testing, debugging, version control, and translating operational requirements into practical software solutions.

RELEVANT EXPERIENCE

Web Developer Intern/OJT - DOST Region X

February 2026 - June 2026

- Developed and maintained internal web applications supporting office operations using React, Laravel, PHP, and MySQL.
- Implemented frontend and backend features and resolved bugs in existing systems.
- Collaborated with staff to gather workflow requirements and translate them into practical software features.
- Used GitHub for version control, collaboration, and source-code management.
- Prepared technical or user documentation for completed systems.

PROJECT

Real-time Automated Mango Sorting and Quality Grading System

January 2025 - June 2026

Using Deep-Learning | C#, YOLOv8, ONNX Runtime, OpenCV, Arduino

- Developed a real-time mango detection and quality-classification system integrated with a physical sorting machine.
- Implemented a C# desktop application for camera capture, model inference, serial communication, classification history, and CSV exporting.

Organization Fee Collection & Financial Tracking System

May 2026 - Current(Ongoing)

- Developed a fee collection and financial tracking system web application for university organizations
- Role : Frontend Developer
- Developed using React for frontend, Laravel for backend, PostgreSQL for Database

Oceanify: Weather application tailored for seafarers

October - November 2025

- Developed a weather application fit with interactive maps, maritime weather data, and alert and rescue notifications
- Role : Database Programmer
- Developed using React for frontend, Laravel for backend, Supabase for cloud database

Healthier(Cross-platform Application)

May 2025

- Created an activity tracking, calorie tracking, and meal planner application using spoonacular api.
- Add food for the day and track calorie intake of each inputs. Activities can also be logged and is reflected in the intake data.
- Developed using flutter

Point of Sale System and Inventory Management

November-December 2024

- Developed a point of sale system + inventory management desktop application.
- Transaction module for egress of items and inventory system for ingress of items
- Developed using VB .net and MySQL

EDUCATION

BS Information Technology

2022 - 2026

Central Mindanao University — University Town, Musuan, Maramag, Bukidnon

- 2022-2026
- Graduated Cum Laude

TECH STACK

Languages: PHP, JavaScript, SQL, Dart, Java, C#, VB.NET

Frameworks and Libraries: React, Laravel, Flutter, Vue.js, Express.js, Tailwind CSS

Databases and Platforms: MySQL, PostgreSQL, Firebase Firestore, Supabase

Tools: Git, GitHub, Postman, Visual Studio, VS Code

Deployment: Vercel, Railway, AWS deployment fundamentals
